No blackjack, também conhecido como 21, o objetivo do jogo é ter um valor de cartas maior que o dealt by the dealer, without going over 21. The following are the basic rules of Blackjack:

1. The game is usually played with one to eight decks of 52 cards.
2. The values of the cards are as follows:
 - Cards 2 through 10 are worth their face value.
 - Face cards (J, Q, K) are worth 10 points.
 - Aces are worth 1 or 11 points, whichever is more beneficial to the player.
3. Each player starts with two cards, one face up and one face down.
4. The dealer also receives two cards, but only one is face up.
5. If the player's first two cards have a combined value of 21 (an ace and a ten-card), this is called a "blackjack" and the player automatically wins, unless the dealer also has a blackjack.
6. If the player's first two cards have a combined value of less than 21, the player has the option to "hit" (take another card) or "stand" (stick with the current total).
7. If the player's total exceeds 21, the player "busts" and automatically loses the hand.
8. If the dealer's face-up card is a ten or an ace, the dealer checks for blackjack. If the dealer has blackjack, all players lose, except those with blackjack.
9. If the dealer does not have blackjack, the dealer reveals the face-down card and hits until the total is 17 or more.
10. If the dealer busts, all remaining players win.
11. If the dealer does not bust, the player with the total closest to 21 without going over wins.
