Video game of multiple players

"Multiplayer" redirects here. For other multiplayer games, see Game § Multiplayer

A multiplayer video game is a video game in which more than one person can play in the same game environment at the same time, either locally on the same computing system (couch co-op), on different computing systems via a local area network, or via a wide area network, most commonly the Internet (e.g. World of Warcraft, Call of Duty, DayZ). Multiplayer games usually require players to share a single game system or use networking technology to play together over a greater distance; players may compete against one or more human contestants, work cooperatively with a human partner to achieve a common goal, or supervise other players' activity. Due to multiplayer games allowing players to interact with other individuals, they provide an element of social communication absent from single-player games.

History [edit]

Some of the earliest video games were two-player games, including early sports games (such as 1958's Tennis For Two and 1972's Pong), early shooter games such as Spacewar! (1962)[1] and early racing video games such as Astro Race (1973).[2] The first examples of multiplayer real-time games were developed on the PLATO system about 1973. Multi-user games developed on this system included 1973's Empire and 1974's Spasim; the latter was an early first-person shooter. Other early video games included turn-based multiplayer modes, popular in tabletop arcade machines. In such games, play is alternated at some point (often after the loss of a life). All players' scores are often displayed onscreen so players can see their relative standing.

Danielle Bunten Berry created some of the first multiplayer video games, such as her debut, Wheeler Dealers (1978) and her most notable work, M.U.L.E. (1983).

Gauntlet (1985) and Quartet (1986) introduced co-operative 4-player gaming to the arcades. The games had broader consoles to allow for four sets of controls.

Networked [edit]

Ken Wasserman and Tim Stryker identified three factors which make networked computer games appealing:[3]

Multiple humans competing with each other instead of a computer Incomplete information resulting

in suspense and risk-taking Real-time play requiring quick reaction

John G. Kemeny wrote in 1972 that software running on the Dartmouth Time Sharing System (DTSS) had recently gained the ability to support multiple simultaneous users, and that games were the first use of the functionality. DTSS's popular American football game, he said, now supported head-to-head play by two humans.[4]

The first large-scale serial sessions using a single computer[citation needed] were STAR (based on Star Trek), OCEAN (a battle using ships, submarines and helicopters, with players divided between two combating cities) and 1975's CAVE (based on Dungeons & Dragons), created by Christopher Caldwell (with artwork and suggestions by Roger Long and assembly coding by Robert Kenney) on the University of New Hampshire's DECsystem-1090. The university's computer system had hundreds of terminals, connected (via serial lines) through cluster PDP-11s for student, teacher, and staff access. The games had a program running on each terminal (for each player), sharing a segment of shared memory (known as the "high segment" in the OS TOPS-10). The games became popular, and the university often banned them because of their RAM use. STAR was based on 1974's single-user, turn-oriented BASIC program STAR, written by Michael O'Shaughnessy at UNH.

Wasserman and Stryker in 1980 described in BYTE how to network two Commodore PET computers with a cable. Their article includes a type-in, two-player Hangman, and describes the authors' more-sophisticated Flash Attack.[3] Digital Equipment Corporation distributed another multi-user version of Star Trek, Decwar, without real-time screen updating; it was widely distributed to universities with DECsystem-10s. In 1981 Cliff Zimmerman wrote an homage to Star Trek in MACRO-10 for DECsystem-10s and -20s using VT100-series graphics. "VTtrek" pitted four Federation players against four Klingons in a three-dimensional universe.

Flight Simulator II, released in 1986 for the Atari ST and Commodore Amiga, allowed two players to connect via modem or serial cable and fly together in a shared environment.

MIDI Maze, an early first-person shooter released in 1987 for the Atari ST, featured network multiplayer through a MIDI interface before Ethernet and Internet play became common. It is considered[by whom?] the first multiplayer 3D shooter on a mainstream system, and the first network multiplayer action-game (with support for up to 16 players). There followed ports to a number of platforms (including Game Boy and Super NES) in 1991 under the title Faceball 2000, making it one of the first handheld, multi-platform first-person shooters and an early console example of the genre.[5]

Networked multiplayer gaming modes are known as "netplay". The first popular video-game title with a Local Area Network(LAN) version, 1991's Spectre for the Apple Macintosh, featured AppleTalk support for up to eight players. Spectre's popularity was partially attributed[by whom?] to the display of a player's name above their cybertank. There followed 1993's Doom, whose first network version allowed four simultaneous players.[6]

Play-by-email multiplayer games use email to communicate between computers. Other turn-based variations not requiring players to be online simultaneously are Play-by-post gaming and Play-by-Internet. Some online games are "massively multiplayer", with many players participating simultaneously. Two massively multiplayer genres are MMORPG (such as World of Warcraft or EverQuest) and MMORTS.

First-person shooters have become popular multiplayer games; Battlefield 1942 and Counter-Strike have little (or no) single-player gameplay. Developer and gaming site OMGPOP's library included multiplayer Flash games for the casual player until it was shut down in 2013. Some networked multiplayer games, including MUDs and massively multiplayer online games (MMOs) such as RuneScape, omit a single-player mode. The largest MMO in 2008 was World of Warcraft, with over 10 million registered players worldwide. World of Warcraft would hit its peak at 12 million players two years later in 2010, and in 2024 earned the Guinness World Record for best selling MMO video game.[7] This category of games requires multiple machines to connect via the Internet; before the Internet became popular, MUDs were played on time-sharing computer systems and games like Doom were played on a LAN.

Beginning with the Sega NetLink in 1996, Game in 1997 and Dreamcast in 2000, game consoles

support network gaming over LANs and the Internet. Many mobile phones and handheld consoles also offer wireless gaming with Bluetooth (or similar) technology. By the early 2010s online gaming had become a mainstay of console platforms such as Xbox and PlayStation.[citation needed] During the 2010s, as the number of Internet users increased, two new video game genres rapidly gained worldwide popularity – multiplayer online battle arena and battle royale game, both designed exclusively for multiplayer gameplay over the Internet.

Over time the number of people playing video games has increased. In 2024, the majority of households in the United States have an occupant that plays video games, and 65% of gamers play multiplayer games with others either online or in person.[8]

Local multiplayer [edit]

A LAN party

For some games, "multiplayer" implies that players are playing on the same gaming system or network. This applies to all arcade games, but also to a number of console, and personal computer games too. Local multiplayer games played on a singular system sometimes use split screen, so each player has an individual view of the action (important in first-person shooters and in racing video games) Nearly all multiplayer modes on beat 'em up games have a single-system option, but racing games have started to abandon split-screen in favor of a multiple-system, multiplayer mode. Turn-based games such as chess also lend themselves to single system single screen and even to a single controller.

Multiple types of games allow players to use local multiplayer. The term "local co-op" or "couch co-op" refers to local multiplayer games played in a cooperative manner on the same system; these may use split-screen or some other display method. Another option is hot-seat games. Hot-seat games are typically turn-based games with only one controller or input set – such as a single keyboard/mouse on the system. Players rotate using the input device to perform their turn such that each is taking a turn on the "hot-seat".

Not all local multiplayer games are played on the same console or personal computer. Some local multiplayer games are played over a LAN. This involves multiple devices using one local network to play together. Networked multiplayer games on LAN eliminate common problems faced when playing online such as lag and anonymity. Games played on a LAN network are the focus of LAN parties. While local co-op and LAN parties still take place, there has been a decrease in both due to an increasing number of players and games utilizing online multiplayer gaming.[9]

Online multiplayer [edit]

Online multiplayer games connect players over a wide area network (a common example being the Internet). Unlike local multiplayer, players playing online multiplayer are not restricted to the same local network. This allows players to interact with others from a much greater distance. Playing multiplayer online offers the benefits of distance, but it also comes with its own unique challenges. Gamers refer to latency using the term "ping", after a utility which measures round-trip network communication delays (by the use of ICMP packets). A player on a DSL connection with a 50-ms ping can react faster than a modem user with a 350-ms average latency. Other problems include packet loss and choke, which can prevent a player from "registering" their actions with a server. In first-person shooters, this problem appears when bullets hit the enemy without damage. The player's connection is not the only factor; some servers are slower than others.

Asymmetrical gameplay [edit]

Asymmetrical multiplayer is a type of gameplay in which players can have significantly different roles or abilities from each other – enough to provide a significantly different experience of the game.[10] In games with light asymmetry, the players share some of the same basic mechanics (such as movement and death), yet have different roles in the game; this is a common feature of the multiplayer online battle arena (MOBA) genre such as League of Legends and Dota 2, and in hero shooters such as Overwatch and Apex Legends. In games with stronger elements of asymmetry, one player/team may have one gameplay experience (or be in softly asymmetric roles) while the other player or team play in a drastically different way, with different mechanics, a different type of objective, or both. Examples of games with strong asymmetry include Dead by Daylight, Evolve, and Left 4 Dead.[10]

Asynchronous multiplayer [edit]

Asynchronous multiplayer is a form of multiplayer gameplay where players do not have to be playing at the same time.[11] This form of multiplayer game has its origins in play-by-mail games, where players would send their moves through postal mail to a game master, who then would compile and send out results for the next turn. Play-by-mail games transitioned to electronic form as play-by-email games.[12] Similar games were developed for bulletin board systems, such as Trade Wars, where the turn structure may not be as rigorous and allow players to take actions at any time in a persistence space alongside all other players, a concept known as sporadic play.[13]

These types of asynchronous multiplayer games waned with the widespread availability of the Internet which allowed players to play against each other simultaneously, but remains an option in many strategy-related games, such as the Civilization series. Coordination of turns are subsequently managed by one computer or a centralized server. Further, many mobile games are based on sporadic play and use social interactions with other players, lacking direct player versus player game modes but allowing players to influence other players' games, coordinated through central game servers, another facet of asynchronous play.[13]

Online cheating [edit]

Online cheating (in gaming) usually refers to modifying the game experience to give one player an advantage over others, such as using an "aimbot" – a program which automatically locks the player's crosshairs onto a target – in shooting games.[14][15][16] This is also known as "hacking" or "glitching" ("glitching" refers to using a glitch, or a mistake in the code of a game, whereas "hacking" is manipulating the code of a game). Cheating in video games is often done via a third-party program that modifies the game's code at runtime to give one or more players an advantage. In other situations, it is frequently done by changing the game's files to change the game's mechanics.[17]

E-mail:

Não tinha planejado deixar de ser um conselheiro com uma mensagem WhatsApp sem cerimônias, carregada-expletivo para meus colegas da ala. Mas depois meses do estresse a versão bêbada me forçou minha mão e eu não poderia levá-lo volta!

Não começou assim. Quando fui eleito como vereador trabalhista bullsbet oficial Southwark, no sul de Londres 2024 foi o culminar do sonho ao longo da vida que eu sempre tive interesse pela

política e quando assisti à Parliament por diversão na adolescência; além das minhas ambições para casar com um homem rico ou ter uma dupla Christian Louboutin (era a década dos anos 2000) escrevi sobre meu desejo nas casas onde estava sentado...

Mas depois de finalmente colocar o pé na porta, fiquei chocado com a realidade do trabalho – começando pelo processo seletivo. Um cronograma cansativo para bater as portas e aumentar apoio local aos candidatos foi encorajado; minhas horas foram rastreadas impiedosamente bullsbet oficial um aplicativo pela equipe da campanha locais que os alimentou de volta para o chefe regional. No período antes da eleição, você deve completar cinco sessões por semana com duas horas semanais e uma sessão extra no fim-de-semana quinzenal bullsbet oficial cima ao lado do seu trabalho diário; se não cumprir as suas tarefas diárias é enfrentar a pancadaria!

Foi só para ganhar a eleição, eu disse-me. Ele iria desistir uma vez que tínhamos vencidos e nós ganhamos de fato! No começo amei o trabalho Eu ajudei os residentes com baixa renda durante as crises do custo da vida Ajudava alguém entrar bullsbet oficial habitação social I passaria horas ao telefone Com moradores deixá-los sair ou porque pensei eles podem estar sozinhos Todos foram apresentados aos serviços Que não conhecia As pessoas inspiraram Pessoas lá... As verdadeiras questões começaram quando eu tive que voltar para o meu trabalho diário. Ser vereador não é um papel bullsbet oficial tempo integral, e foi uma das quais levei a casa menos de 13 mil por ano; muitas vezes me levava à cirurgia mais do grupo durante os três dias da noite até chegar ao fim-de-semana seguinte com minha reunião típica ou encontro no qual havia reuniões sem controle sobre política depois dos eventos na Windrushs – isso se tornaria completamente incontrolável.”

medida que o custo de vida se tornou mais arraigado, intensificou-se ainda maior desespero dos moradores. As nossas cirurgias comunitárias foram preenchida com pessoas frustradamente presas nas engrenagens da burocracia e tentaram não navegar bullsbet oficial sistemas labirínticos para apoio à habitação ou queixaram ao grupo do ruído sobre os seus vizinhos; As pessoas vinham até nós para reclamar (corretamente) sobre as coleções de lixo, mas também ouvíamos falar das gentes com ideação suicida tentando escapar da violência doméstica diante dos sem-teto e sendo ameaçadas por um proprietário privado que estava bullsbet oficial despejo. Ou crianças ficando doentes invadindo os tetos do apartamento sob ressecção; muitas vezes moradores estavam zangado conosco – o mesmo se dá compreensivelmente assim!

Uma década de austeridade não foi gentil com os conselhos. Durante a 2010 nos 10% mais privados dos Conselhos, o financiamento caiu 35% por pessoa bullsbet oficial comparação aos 15% nas áreas menos privadas A demanda pelos serviços aumentou mas havia muito pouco para gastar neles e alguns deles tiveram que declarar falência na verdade - isso tem limitado severamente aquilo como pode ser feito no conselho da cidade – porém isto era um pequeno conforto às pessoas sentadamente diante também!

Eu não queria que minha paixão pelas pessoas cedesse lugar à frieza, um folheado gelado construído para me proteger contra a correia transportadora de gente com dor entrando na cirurgia da enfermaria. Fui avisado desse inevitável arrepio do desespero por amigos e médicos ou enfermeiras... Que mudaram suas carreiras... Ou se mudou pra Austrália Para evitar sentimentos semelhantes ao desesperado? Então comecei evitando meu email inbox! Senti-me completamente queimado (em inglês).

As expectativas de campanha também não cessaram – desta vez para outros candidatos. Fim-de-semana alternados entre bater a porta bullsbet oficial outra área e realizar cirurgia na enfermaria, quando eu fui finalmente assinado com exaustão trabalho fora do emprego o profissional da saúde mental me disse que precisava passar mais tempo comigo amigos ou familiares mas ela deu uma lista local livre aulas yoga um Alcoólico Anonymous reunião Eu percebi era tinha sido minha bebida / stress gestão foram os problemas eles - Levei mais um ano para trabalhar a coragem de sair. Por que eu escolhi ficar com algo o qual estava arruinando minha saúde mental? A resposta simples é: Eu me senti endividado s pessoas, quem ajudou na eleição; à comunidade negra disse-me como era bom ver uma jovem

mulher preta nas políticas locais... Não queria desapontá-lo ou sentir se desistia delas!
Mas, finalmente eu percebi que permanecer na política não estava fazendo bem a ninguém.
Quando me demito deixei para trás muitas pessoas incríveis e tive resiliência bullsbet oficial fazê-lo apesar do quanto isso exige deles por causa dos seus profundos cuidados com outras pessoa...

Meus colegas foram graciosos o suficiente para ignorar minha mensagem no bate-papo bullsbet oficial grupo. Eu os conheci e comecei a me demitir muito mais civilizadamente – chorando por causa do café,

E mesmo que eu tenha percebido minha carreira de sonho na política não era para ser, também aprendi a retribuir por outras maneiras. De grupos comunitários e clubes esportivos festivos projetos jardinagem bullsbet oficial coro ou creches me mostrou quantas formas existem pra fazer diferença: parar foi o melhor caminho do meu trabalho; Foi uma boa opção pro povo ao qual fui eleito servir!
