The best thing you can do to get started is to take the time to consider each product's life cycle as it flows into and out of your warehouse.

Choosing the best storage solution

How and where can you start storing and stocking those products more intuitively to reduce the walk sequence of your pickers? Where does each product come from? What size and volume of storage bins are needed to store each product? What is the life cycle of the product? Ensure to support your efforts with the storage solutions that work best for your warehouse. Modular storage bins, flow racks, packing stations, and picking carts can help you get those products exactly where they need to go while providing the flexibility you need to shift and adapt as you learn better how to store and keep track of your inventory.

Product Picking and Order Processing Inefficiencies

Product picking and order processing inefficiencies are an increasing challenge for supply chains, especially as e-commerce orders continue to soar. Adapting to smaller pick orders on shorter return times requires complete optimisation of the product picking process, you stand to increase profitability by boosting the number of orders your warehouse can pick and ship in a shift or day. "First In, First Out" or FIFO with modular storage bins may provide the answer. Especially for applications where products have a shelf life or expiration date, it's essential to pick and pack the oldest products in the warehouse first. The PIX® range of storage solutions can help support FIFO. From picking carts to organised storage bins, there are many tools you can implement in your warehouse to deliver products to pickers in a way that supports FIFO throughout your warehouse. Don't address material flow in a single aspect. Where material comes from, where it needs to go, and the method of fulfilling this process are all aspects to consider with a warehouse storage system. Custom workstations are another ideal warehouse solution. Packaging and repackaging for order processing is a drain on profitability. When everything your operators need is within

easy reach, and their workstations are organised according to their specific needs, you can improve process time and save space.

Product Handling Errors and Inefficiencies

When items are mis-picked or damaged in the warehouse, those inaccuracies and breakages are paid for by the facility. While some level of product handling damage is expected, minimising it can go a long way to improving your facility's returns. The solution: Organisation, proper warehouse storage, and material handling solutions that reduce damage. The first step in minimising product handling damages is to reduce product handling. This may seem elementary but take the time to walk through the process for each product and see how many times it is touched before it is packed, then look for opportunities to reduce handling. A poorly organised warehouse often means overloading shelves and racks, which can lead to significant damages and mixing up of stock as it falls from pick faces. PIX® SLOTS can be designed with angled shelving to alleviate these handling errors and damaged products, with no lips to the shelving being needed and smaller stock items that are prone to sliding to the floor retained in the pick bins.

Kaliane Bradley: A Rising Star in the Literary World

Kaliane Bradley is a name to watch in the literary world. She has just published her first novel, "The Ministry of Time," a time-travel romance cum sci-fi comedy set in near-future London. The novel has received praise from writers such as Eleanor Catton and David Nicholls and has a TV adaptation in the works.

From Walthamstow to the World

Bradley was born and raised in Walthamstow, east London, where she still lives with her partner and cat. She grew up in a multicultural household, with a British father and a Khmer mother who moved to the UK during the Cambodian civil war. She spent her childhood sharing a bedroom with her twin sisters and her half-brother while her parents rented out the house.

"The Lucky Jumper" and The Ministry of Time

Bradley wrote "The Ministry of Time" by accident, as she puts it. She had been working on a "thankless, loveless" project for years but found herself drawn to time-travel stories during the

pandemic. She immersed herself in the TV series "The Terror" and became fascinated by Lt. Graham Gore, a man of "great stability of character and sweetest of tempers." This fascination led her to create a "nerdy literary parlour game" online, which eventually turned into the novel.

In "The Ministry of Time," Bradley explores the experience of immigrants in modern Britain by placing "expatriates from history" in modern London. She uses time-travel as a metaphor for the assimilation of immigrants into British society, as they are told they must assimilate, have certain values, and be productive for society. The hilarious and sparky one-liners afforded by the time-travel conceit make the novel a fun and thought-provoking read.

"Maybe this is the British-Cambodian novel I was supposed to be writing."

Through Gore, Bradley found a way to express her mother's past and the inherited trauma of Cambodia's history. Gore's realization that "they are all dead" and the world he knew is gone is a poignant reflection of the trauma experienced by refugees and immigrants. While Bradley has no plans to give up her day job, she is already deep into her second novel, an extension of her prize-winning short story.
