GGPoker hand history - how to download and import into a poker tracker?

The Good Game

poker network (GGPoker, PokerOK, Natural8) 0 is the opponent of any poker software. Neither poker trackers nor auxiliary programs like StarsCaption work at GGPoker. The reason 0 is the desire to create the same conditions for all players. According to management, poker software gives professional poker players 0 an unfair advantage.

Since

the network was founded in 2014 until recently, hand history has been unavailable.

However, on November 4, 0 2024, Good Game went to meet the requests of the players. Today we'll talk about how to download hand history 0 and import it into a poker tracker.

How

to download hand history from GGPoker - step by step instructions

1. Log in 0 to your

account through the poker room client (in our example, this is PokerOK).

2. Go to

PokerCraft. It will open 0 as a new page in your browser.

3. There are many subsections

in the PokerCraft tab, but we are only interested 0 in:

Rush & Cash;

Holdem;

Omaha;

My

Tournaments.

You cannot download the entire hand history from GGPoker with one button.

You will have to go 0 to each of the subsections and download it separately.

4. To

download your hand history, go to Holdem, select the files 0 with the checkboxes and click on the Game History window that appears. Hand history files are split into sessions. Then 0 click on "Download". The download process will begin.

The history from

GGPoker is saved on the computer as an archive. For 0 further work with HH you need an archiver. Free WinRAR will do the trick.

Features of GGPoker hand histories

The

inconvenience of 0 working with hand histories from GGPoker is not limited to the download process and the need to unpack the archive. 0 Other features of HH:

saved in

text format txt. This makes it difficult for poker trackers to work when importing hand

0 histories;

all opponents' nicknames are displayed as encrypted combinations of numbers and letters. It will not be possible to do any 0 analysis of the game of opponents and notes;

you are marked as "Hero" in the hand histories. A common mistake of 0 players is to search the tracker database by their real nickname on the Good Game network.

Of the

poker trackers, only 0 PokerTracker 4 and Holdem Manager 3 are able to import hand histories from GGPoker. Hand2Note still doesn't support HH directly.

How 0 do I import my

hand history into Holdem Manager 3?

Holdem Manager 3 was the first to add the possibility to 0 import hand histories from GGPoker.

1. Unpack the archive (Extract files...) with hand history into a separate folder. Do not unpack 0 the downloaded files to your desktop, otherwise they will fill up the entire space of your screen and complicate your 0 work.

2. Launch Holdem Manager 3;

3. At the top of the HM3 window, sequentially click on "File" - "Import Folder". The 0 process of importing hands into your database will begin. If the hand history is voluminous (from 100,000 and above), then 0 the import will take a long time.

How do I import my hand history into

PokerTracker 4?

After downloading the hand histories 0 from GGPoker, you need to:

- 1.

Unpack the archive with hand history into a separate folder.

2. Launch PokerTracker

- 4.

3. In the 0 "Play Poker" tab, click on "Get Hands From Disk", then on "Select Directory". Select the hands folder and the import 0 will start.

How to import hand

history from GGPoker to Hand2Note?

Despite numerous requests from users, Hand2Note developers have not yet added 0 the possibility to import hand histories from GGPoker to the tracker. However, there is a workaround:

1. A converter for GGPoker 0 appeared on the official Hand2Note website on March 21. When using it, you can convert hands from Good Game into 0 a format that the tracker understands.

2. Enter your email address, add the downloaded hand history using "Browse Files" and click 0 on "Convert". The converted data will be sent to your mail.

3. Start the poker tracker.

4. Next, create a new database

0 and import the files into Hand2Note. The database is created in a few clicks:

"Configuration" - "Database" - "Create Database". 0 Give a name to the new database, click "Activate" and restart the poker tracker.

How do I import my hand history 0 into DriveHUD?

DriveHUD also supports importing hand histories from GGPoker:

1. Launch

DriveHUD;

2. On the right side of the poker tracker, click 0 on the "Import" button and select "Import from directory";

3. Specify the folder with hand history.

How to speed

up the import 0 of files into a poker tracker?

If you are uploading a large volume of

files to any of the listed poker 0 trackers, the import process will be slow. The reason for the low speed - the history of hands from GGPoker 0 is saved in the format: "1 hand - 1 file". Therefore, the tracker loses time each time opening a new 0 file and the entire import process is delayed. There is an easy way to speed up the process. You need 0 to combine all files into one:

1. Click on the "Windows" icon and write "cmd" in the line.

2. Run Command Prompt 0 as administrator using the right mouse button.

3. In the

command line, select the disc with your hand history. If it 0 is on the C drive, then nothing needs to be changed.

4. Point to the desired folder in the command the 0 bottom

line. To do this, enter "cd E" and copy the address with the folder from the explorer.

5. Enter the 0 command shown in the screenshot below and press "Enter".

The

process of combining the files will begin. As a result, all 0 hands will be in one file and this will save you a lot of time.

How to play on PokerOK with 0 statistics and HUD?

In October 2024, we added the GGConverter to our catalog. The converter allows you to play with statistics 0 and HUD on PokerOK and other poker rooms of the network in real time. The program supports all leading poker 0 trackers: Hand2Note, Holdem Manager 3, PokerTracker 4. While it works only with the mobile version of PokerOK. You will need 0 an emulator to play the game. We recommend LDplayer or NoxPlayer.

We offer a free trial

version of GGConverter. It does 0 not differ from the paid version. To get the trial please contact us in any way. All information how to 0 install and configure the converter is in the manual.
